6 July 2018

Dear Ms Orgill

The report to follow outlines your results from the Friends and Family Test. This report is based on the feedback from 41 patient questionnaires in June 2018.

In order to enable us to improve our services we would be grateful if you could complete a feedback form using the following link: <http://www.cfepsurveys.co.uk/questionnaires/feedback/default.aspx?psid=218978>

Please contact the office on 01392 927005 or reports@cfepsurveys.co.uk if you require further information about your results.

I hope the report forms a useful basis for reflection on the service provided to patients.

Yours sincerely

CFEP UK Reports Team

Frequency and distribution of ratings for the Friends and Family Test question

How likely are you to recommend our GP practice to friends and family if they needed similar care or treatment?

Table 1

Criteria category for scoring	Response scale	Number of responses	Percentage of responses*
Promoters	Extremely likely	22	55%
Passive	Likely	12	30%
Detractors	Neither likely nor unlikely	3	8%
	Unlikely	1	3%
	Extremely unlikely	1	3%
	Don't know	1	3%
Total responses to this question		40	102%

* May not add up to 100% due to rounding

Number of patients who left Q1 blank (but provided other feedback on the questionnaire)	1
Total number of patients providing feedback	41

Graph 1

85% of patients who responded to the survey would be either extremely likely or likely to recommend your practice to friends and family if they needed similar care or treatment.

The sum of the 'Extremely likely' and 'Likely' percentage of responses in Table 1 may not equal the percentage in the grey box above due to rounding.

Of those 40 patients who answered the Friends and Family Test question, 40 (100%), filled out a paper questionnaire and 0 (0%), completed a questionnaire online.

Patient comments

The following comments are from patients who indicated that they were happy for these to be made public.

All comments are included in their entirety but all attempts have been made to remove details which could identify specific patients or practitioners.

Please tell us why you answered as you did in question 1:

- Very very kind.
- Not much trust in particular doctors due to misdiagnosis on few occasions with family and friends also ending up in hospital very ill. I also have been let down.
- Great treatment every time.
- So hard to get an appointment. Taken four weeks as had to keep ringing "we are not able to give out any more appointments today, ring again 8am tomorrow". Sometimes it's not possible to ring back at 8am next day so have to keep trying.
- Because they are always helpful and can always get an appointment.
- Great help.
- Very good.
- The surgery is clean, friendly reception staff, good experiences with new and existing doctors at the practice.
- Don't come very often but seen and doctor courteous when do.
- Find no problem. Always helpful.
- More GPs needed. In the past 2 years only ever get/had sit and wait appointments.
- Have been a patient at John Ryle for many years and been satisfied.

Please tell us why you answered as you did in question 1:

- I have received lovely care since being with this practice. The staff are all so very lovely and helpful. When I had an infection I think the staff were amazing at helping with my care.
- I find it very helpful if me or my children are ill.
- Dealt with right away.
- Very good doctors.
- Never had any particular issues with the practice and the experience is similar for my partner at another practice, so why change?
- I've had no problems to speak of and caring service.
- One doctor is fantastic.
- I get satisfaction.
- Massively long wait times for appointments.
- Always polite and professional.
- I am happy with my doctor.

Additional information on the Friends and Family Test

The Friends and Family Test (FFT) is a feedback tool that supports the fundamental principle that people who use NHS services should have the opportunity to provide feedback on their experience that can be used to improve services. It is not a traditional survey. It is a continuous feedback loop between patients and practices.

Practices can use the feedback gathered through the FFT to celebrate successes and to support staff to make improvements where the experience of service does not live up to expectations. FFT results are also one useful source of information which can help to inform choice for patients and the public.

More information and guidance about the use of the FFT in the NHS can be found at <http://offlinehbpl.hbpl.co.uk/NewsAttachments/PGH/FFT.pdf> and <http://www.england.nhs.uk/wp-content/uploads/2014/07/fft-imp-guid-14.pdf>.
